Assignment 1

To Be Submitted by Wednesday September 23
- a zipped copy of your NetBeans project to the dropbox
  - use File > Export Project > To ZIP
  - the name of this file should be yourName_a1.zip

Programming Style
- this is to be an individual effort
  - do not work with anybody to complete the assignment
- follow the programming style outlined in the text Chapter 1.7
  - use at least two line comments and two block comments
  - use proper indentation and spacing
  - use either End-of-line or Next-line style

Basic Code Requirements
- the first lines of your code should contain
  ```
  /**
  Your Name
  Your Student Number
  Assignment 1
  Date
  */
  ```
- create a Java project called MyInitials that
  - prints out your initials using your initials
    - do not use any symbols such as *
  - each initial must be at least five characters high
  - must be in the shape of the letter
  - must contain at least 20 characters in total
  - must contain at least three letters
    - if necessary, make one up
  - must use \t and \n to properly space the initials
  - you full name should appear along the bottom of the page

  example:
  ```
  L                   I           TTTTT
  L                   I             T
  L                   I             T
  L                   I             T
  L L L L             I             T

      Your full name
  ```
